Medical Disease Risk Report

Generated: 2026-04-28 22:38:59

Patient Profile

- age: 0.16279069767441862
- thalach: 0.8785046728971964
- oldpeak: 0.0
- sex 1: True
- cp 3: False
- cp 4: False
- exang 1: False
- slope 2: False
- ca 2: False
- thal 7: False

Risk Summary

Predicted Class: 0

Risk Probability: 4.09% (Low)

Top Contributing Risk Factors

- cp 4: reduces risk (SHAP=-0.7757)
- age: reduces risk (SHAP=-0.7693)
- thal 7: reduces risk (SHAP=-0.6788)

Recommended Next Steps

- Maintain current lifestyle and annual health screening.
- Keep balanced diet and regular physical activity.

Cost-Benefit Insight

Early intervention saves approx $82 in avoidable long-term care costs.
